

ASQ Materials List

Before completing the ASQ, it is helpful to gather materials needed for your child's age. The Materials Lists in the next pages show the toys, objects or other materials that are included in the questions on the ASQ by child's age.

Each ASQ age range is listed followed by the objects you may need to help you complete the questionnaire.

Most items can be found in a home or childcare setting. There are a few items such as steps, stroller, shopping cart, or wagon that may not be easily available at home. Other objects may be used in their place if they help demonstrate the same skill as in the original item.

In the following pages, look for the Materials Needed list that matches your child's age.

- Check the list for toys, objects or materials that may need to be gathered before entering your responses in the online session. You can also use these lists for other play and learning ideas that fit your child's age range and interests.
- Ask your child care provider if you would like help to find or use any of the materials or if you would like help to answer any of the questions on the ASQ.
- You will only need the items in the list that matches your child's age.

Reminder: Whenever possible, it is best to use materials that are familiar and that your child has had time to play with.
