
ASQ Materials List

Before completing the ASQ, it is helpful to gather materials needed for your child's age. The Materials Lists in the next pages show the toys or objects used in each ASQ.

- Choose the Materials List for your child's age.

Most items can be found in a home or childcare setting. In some ASQ ages a few items ask about using beads, ball, steps, or stroller. If they are not available, other objects may be used in their place as long as they help demonstrate the same skill in the ASQ item. Your child care provider, or your child's teacher can help with this.

-
- Before you fill out an ASQ, check the list for toys or objects you may need.
 - Be ready to try activities if you have not already seen your child do a skill.
 - Ask your childcare provider for help to find materials, if needed.
 - You will only need the items in the list for your child's age.

Reminder: Whenever possible, it is best to use materials that are familiar and that your child has had time to play with.
